

# BLACK BERRY FLAVOR

---

## DESCRIPTION

Black Berry Flavor is a taste supplement which makes all animal feeds more desirable and palatable.

## APPLICATIONS

Black Berry is an interesting flavor that can be used in various feed formulations. Use it as an enhancer for feeds you have developed for dairy and beef cattle, pigs, hogs and sheep.

## FEATURES AND BENEFITS

This practical addition provides strong stability for a long period after mixing. It is easy to use and blends well.

## RECOMMENDED FEED BLEND

Use 1 to 2 pounds of Black Berry Flavor per ton of feed.

## INGREDIENTS

Black Berry Flavor is a blend of black currant, berry, vanillin, natural and artificial flavors, natural and artificial sweeteners, roughage products and TBHQ (to preserve flavor).

## APPEARANCE

Black Berry Flavor is a finely textured, light brown, free-flowing granular material.

## COMPATIBILITY

It is safe and effective with all ingredients normally used in animal feeds.

## PURITY

It is manufactured and sold in strict compliance with the U.S. Food and Drug Administration's standards for purity and quality.

## PACKAGING

Standard packaging for dry-formulations is a 50-lb. Bulk bag. Products can also be packaged in a range of 1 to 2 ½ lbs. heat-sealed packets upon request.

For further details, consult your Agri-Flavors representative or call the factory direct.

\*Optional packet sizes available upon request.
