

DAIRY SWEET

DESCRIPTION

Dairy Sweet provides a uniform, fresh, grain flavor for dairy herd feeds.

APPLICATIONS

This extremely palatable flavoring adds to any herd feed program by establishing and maintaining a uniform high acceptance for dairy rations and other ruminant feeds. It also promotes better "fines" clean-up by dairy cows.

FEATURES AND BENEFITS

Cows quickly develop a taste for Dairy Sweet, which permits a wide variation in other feed ingredients. This makes it easier to balance rations and change feed formulations. Dairy Sweet offers the added benefit of covering the bitterness of urea. It is highly stable, economical and easy to blend into your dairy herd formulations. Here is a proven and researched product to help you insure satisfied feed customers..

RECOMMENDED FEED BLEND

Use 1 to 2 pound per ton of feed.

INGREDIENTS

Dairy Sweet contains one or more of the following natural or nature identical ingredients: rice hulls, cob fractions, vermiculite, attipulgite clay, fructose, dextrose, lactose, saccharin, whey, acetic acid, citric acid, malic acid, butyric acid, citrus oils, esters of butter, esters of butter rum, balsamic vanilla, mineral oil and TBHQ (to preserve flavor).

APPEARANCE

Dairy Sweet is a finely textured, tan, free-flowing granular material.

COMPATIBILITY

It is safe and effective with all ingredients normally used in animal feeds.

PURITY

It is manufactured and sold in strict compliance with the U.S. Food and Drug Administration's standards for purity and quality.

PACKAGING

Standard packaging for dry-formulations is a 50 lb. Bulk bag. Products can also be packaged in a range of 1 to 2 ½ lbs. heat-sealed packets upon request.

For further details, consult your Agri-Flavors representative or call the factory direct.

*Optional packet sizes available upon request.
