

SPECIAL PIG FLAVOR (SWEET)

DESCRIPTION

Special Pig Flavor (Sweet) is a sweetened flavor formulated specifically for pig starter rations.

APPLICATIONS

Agri-Flavors' Special Pig Flavor was developed to attract nursing pigs to dry feed, and at the same time, promote a consistent intake necessary for the success of early weaning programs.

FEATURES AND BENEFITS

This flavoring combines the sweet flavor that young pigs are known to prefer with other highly acceptable flavors and aromas, a combination which provides a very effective additive for pig starters and pre-starters.

RECOMMENDED FEED BLEND

Use 1 to 2 pounds per ton of feed to achieve the sweetening effect of 100 to 200 pounds of sugar.

INGREDIENTS

Special Pig Flavor (Sweet) is a blend of rum, maple, other natural and artificial flavors, natural and artificial sweeteners, roughage products, attapulgite clay and TBHQ (to preserve flavor).

APPEARANCE

Special Pig Flavor (Sweet) is a finely textured, light brown, free-flowing granular material.

COMPATIBILITY

It is safe and effective with all ingredients normally used in animal feeds.

PURITY

It is manufactured and sold in strict compliance with the U.S. Food and Drug Administration's standards for purity and quality.

PACKAGING

Standard packaging for dry-formulations is a 50-lb. Bulk bag. Products can also be packaged in a range of 1 to 2 ½ lbs. heat-sealed packets upon request.

For further details, consult your Agri-Flavors representative or call the factory direct.

*Optional packet sizes available upon request.
